A MORE YOUTHFUL APPEARANCE

FOR THE SKIN AND BODY

The Beauty Angel is NOT a tanning booth.

It utilizes 30 full body red light lamps (non-uv) together with platform based vibration exercise technology to stimulate the body and create the ultimate rejuvenation and muscle toning environment. The Beauty Angel experience begins with total body exposure to red light energy with output at the desired wavelengths of 600-700 nanometers. This stimulates cell energy and enhances the body's natural process of skin rejuvenation. Anyone can have firmer skin, toned muscles, increased circulation and a more youthful appearance within 90 days simply by utilizing the revolutionary Beauty Angel unit only at The Sun Emporium.

PHOTO REJUVENATION THERAPY

Skin rejuvenation and body toning

Benefits

- Visibly reduces the appearance of fine lines and wrinkles
- Improves uneven skin appearance
- Reduces pore size
- Lessens the effects of damaging environmental influences
- Speeds the healing of blemishes, like acne and rosacea
- Repairs sun damage & age spots
- Aids in weight loss
- Prevents hair loss & stimulates regrowth in men
- Dramatically fades scars and stretch marks
- Builds collagen, reducing wrinkles, including crow's feet, under eye wrinkles, forehead wrinkles & laugh lines

Areas of concentration

- Face
- Eye area
- Chest/neckline
- Hands
- Thighs/legs
- Feet

PLATFORM BODY VIBRATION

Health and wellness for the entire body

- Reduces the appearance of cellulite
- Stimulates circulation
- Tightens connective tissue
- Relieves stress
- Strengthens muscles
- Enhances feeling of well-being
- Improves flexibility
- Simple, enjoyable, low-impact motion that's ideal for older customers

PROGRAM 1

Wellness (low frequency) – loosens and relaxes muscles

This program improves flexibility and enhances well-being with gentle movements at low vibration frequency.

Duration: 10 minutes

- > Relieves tension and relaxes muscles
- > Improves muscle tone
- > Helps restore muscle performance

PROGRAM 2

Entry level vibration therapy (medium frequency interval) – body fitness for beginners

This program is ideal for beginners and gradually improves fitness with powerful movements at medium frequency.

Duration: 10 minutes

- > Increases fitness
- > Improves muscle function
- > Stimulates the circulation

PROGRAM 3

Intense vibration therapy (high frequency interval) – body fitness for advanced training

This program is excellent for sports enthusiasts and serves to strengthen muscles with powerful movements at high frequency.

Duration: 10 minutes

- > Strengthens muscles
- > Increases muscle power
- > Improves fitness
- > Training for muscle coordination

PROGRAM 4

Beauty (mixed frequency) – improves skin appearance

This program reduces the appearance of cellulite and refines the skin's smoothness with gentle movement at alternating frequency.

Duration: 10 minutes

- > Reduces the appearance of cellulite
- > Helps firm the skin
- > Stimulates blood circulation

PHOTO REJUVENATION THERAPY

RED LIGHT ENERGY TO REJUVENATE THE SKIN

What causes skin aging?

Two main factors influence skin aging. The metabolism slows down with age, which results in decreasing amounts of cell energy in the fibroblasts – cells that produce collagen and elastin. The body's ability to supply fibroblast cells with the nutrients they need also decreases, resulting in lower collagen and elastin production – substances that the body needs for youthful, taut skin.

Skin rejuvenation utilizing specialized light spectra

The BEAUTY ANGEL uses red light energy (non-UV) wavelengths in the 600–700 nm range to activate the body's own Photo Rejuvenation process to reduce the appearance of fine lines and wrinkles, firm the skin and improve the body's overall appearance.

The skin's permeability also increases, improving the effect of skin care products and allowing active ingredients to penetrate deeper.

Red light energy is one of the few ways to gently and effectively reduce the signs of aging and is the ideal choice for anybody who is looking for a natural, noninvasive way to improve the condition of their skin.

Clinically tested and effective

Clinical trials have demonstrated that red light wavelengths in the 600–700 nm range targeted directly onto the skin increase the cells' potential for skin rejuvenation. Combining this treatment with skin care products developed specifically for red light therapy optimizes the overall benefit.

The skin takes on a clearer, more radiant and softer hue at the beginning of the treatment. After a number of treatment sessions, the skin's tint, clarity and texture improve. Studies have confirmed a reduction in the appearance of fine lines on the skin along with a smoother skin surface.

*nanometer = unit for measuring the light spectrum
